DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-7 and 9-11 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5 of copending Application No. 10/010,909. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in the instant application are broader than the co-pending '909 application.

Referring to claim 1 of the instant application, the examiner notes Lines 7-18 of the co-pending '909 application, which contains the control program disclosed in claim 1 of the instant application.

Referring to claims 2-5 of the instant application, see claims 205 of the co-pending '909 application.

Referring to claims 9-11, the examiner notes that it would have been obvious to use either an optical storage media, magnetic storage media or an integrated circuit to be used for the program storage device of claim 1 of the instant application, as well as the co-pending '909 application.

At the time the invention was made, it would have been obvious to a person of ordinary skill in the art, to modify the program storage device, as taught by claim 1 of the instant application and claim 1 of the co-pending '909 application, for the purpose of providing a high capacity storage device (in the case of the optical and magnetic storage devices) and a single solution, low cost processing circuit (in the case of the integrated circuit).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
